**SFCN Rate changes**

Most of the contracts between SFCN and the various channel providers require a cost increase each year. In turn, SFCN must raise its rates to cover these additional costs. Therefore, SFCN will raise Cable TV rates, effective 03/01/2014.

The rate increases (right) only cover the additional costs charged to SFCN and do not add to the margin or profits SFCN may make. Furthermore, the only way SFCN could lower cable rates would be to drop channels; however, the most popular channels are also the most expensive.

If you have any questions or concerns, please call SFCN's 24-Hour Technical Support at 801-798-2877 or for more information go to: [www.sfcn.org/rates/](http://www.sfcn.org/rates/)

Thank you for supporting SFCN!

## Building permit application process

Applying for building permits just got easier and more convenient with the recent enhancements to our online application service. To begin, go to [www.spanishfork.org](http://www.spanishfork.org) and click on the **citienserve** logo found near the center of the page. From here the process is simple and user friendly. After creating a username and password you can apply for a permit and access the application at any time.

The application options include: commercial buildings, residential buildings, accessory structures (e.g., detached garages, sheds, metal carports, etc.), swimming pools, decks, fences, signs, electric service changes, mechanical (e.g., adding or replacing water heaters, furnaces, a/c units, gas appliances, wood burning stoves, water softeners/purifiers, shower/tub, shower valve) and demolitions. If in doubt as to whether or not a permit is required, please call our Building Inspection Department to ask.

To avoid delays in the application process it is best to complete the application to the best of your ability and include all the required documentation as outlined in the submittal requirements. There are informative documents on the application homepage and throughout the application process identified by this  symbol. These documents provide additional information for making the permit and construction process easier and more efficient.

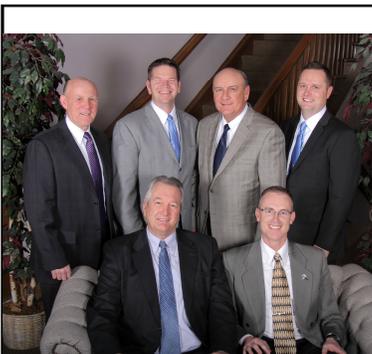

Once you have completed the application process, you will then be able to track the approval of your application, make payments and schedule inspections online. If additional help is needed with the permitting process, feel free to call the Building Inspection Department at 801-804-4540.
