- Prizes will be given throughout the morning.
- Free to the Public

VISIT A SHELTER

Public welcome to tour Red Cross emergency shelter simulation in Lindon

June 24th at the Lindon Community Center from 2 to 4 p.m.

Power Outages

Power outages can be caused by natural events like windstorms, lightning strikes, and heat waves. They may also be caused by transformer or other equipment failure.

We encourage all residents to have battery-operated flashlights, alarm clocks, and radios. It is also important to protect electronic equipment like televisions and computers with 1200 Joule or more surge protectors. Please make sure that dust does not accumulate on surge protectors and power strips, causing a fire hazard.

Water Conservation

The best way to conserve water is to change how we water our yards.

- Avoid watering during the heat of day and during times of wind. It is better to water during the day than when there is wind because wind will evaporate water much faster than the sun.
- Aerate your lawn to increase the amount of water the ground soaks in. This is best done in the spring or fall.
- Water your lawn separately from other landscaped areas.
- Invest in a smart controller.
- Place mulch in planting beds to reduce evaporation. This also reduces weeds.
- Leave small grass clippings on the lawn as a nutrient source.
- Use hardscape or xeriscape landscaping that requires less water.
- Plant drought resistant trees and plants. Ask a local nursery about Utah-friendly landscape materials.
- Control weeds. Weeds use a lot of water.
- Increase the mowing height of your lawn mower. Longer grass grows deeper roots, uses less water and stands the stresses of hot dry weather better.
- Clean driveways, patios and decks with a broom or blower instead of a hose.

Movies in the Park

FOOD TRUCKS START AT 5:00 PM

www.spanishfork.org/movies • Located at City Park 49 S. Main St.
